A student may use credit points earned through an ECTS accredited extracurricular activity in the framework of open elective courses that are part of the accredited study programmes in the 1st-cycle academic study programmes and 2nd-cycle unified master's study programmes, as well as in all other study programmes which offer, in accordance with the accredited curriculum, open elective courses.

If a study programme does not offer open elective courses, a course selected under the ECTS accredited extracurricular activities shall be considered as an additionally completed course. The course's ECTS credits shall be added to the total sum of ECTS credits of the study programme the student is enrolled in, but they shall not affect the number of ECTS credits required for progression to a higher year of study. The student may choose any number of additional courses.

The content, duration and course completion method of an ECTS accredited extracurricular activity are defined in the course syllabus (Annex to this Call).

ECTS accredited extracurricular activities are financed by the University of Maribor. Any additional costs, such as equipment rental, purchase of tickets, transportation, accommodation etc., shall be covered by the students themselves.

Participants decide on a voluntary basis to participate in an extracurricular activity and take part in it on their own responsibility at agreed times according to the timetable set by the faculty carrying out the course as part of ECTS accredited extracurricular activities.

2. Conditions for the Implementation of ECTS Accredited Extracurricular Activities

Courses within the ECTS accredited extracurricular activities are carried out only if there are at least 5 enrolled students, unless the higher education teacher, the course coordinator, decides otherwise.

The same criterion applies to the implementation of courses within the ECTS accredited extracurricular activities at remote faculties of the University of Maribor.

In line with Point 1 of this Call, ECTS accredited extracurricular activities shall also be carried out at remote faculties of the University of Maribor if enough interest is demonstrated in such activities. Students can obtain more information at the Student Affairs Office of the faculty they are enrolled to.

3. Application Conditions

Students enrolled to study programmes of the University of Maribor who hold a valid student status in the current academic year may apply to the Call. The University of Maribor's exchange students may also apply to the Call.

4. Application Deadline

Students may apply to the Call on ECTS Accredited Extracurricular Activities of the University of Maribor at the time of enrolment in a higher year of study in line with the enrolment periods determined by each faculty, or no later than 30. 9. 2020.

5. Application Method

2000 Maribor, Slovenia
www.um.si

Students may apply to the call in two ways, namely:

- If they wish to use an ECTS accredited course in the framework of extracurricular activities as an open elective course of the accredited study programme in which they are enrolled, they select a course under extracurricular activities from available elective courses in the catalogue of Bologna courses. These students obtain an entry in their student folder by the Student Affairs Office, and the course is counted among the acquired credit points of the study programme (credit points also count towards the quota of credit points required for progression through the study programme).
- If they wish to use the course in the framework of ECTS accredited extracurricular activities as an additional course, they must apply with a duly completed application form that is part of the text to this Call (Annex to the Call). Students submit their application form together with other application documentation to the Student Affairs Office of the faculty they are enrolled to at the time of enrolment. These students obtain an entry in their student folder by the Student Affairs Office, and the course is counted among additionally acquired credit points that do not count towards the quota of credit points required for progression through the study programme.

After the student records are managed in the student folders, the students will be able to see the selected ECTS accredited courses in the framework of extracurricular activities among their obligations in the AIPS system.

6. Additional information

For any further information students may contact the Department of Education and Study of the University of Maribor (e-mail: poststudy@um.si), the competent Student Affairs Office of the faculty or the ECTS coordinator at the faculty where they study.

prof. dr. Zdravko Kačič,
Rector of the University of Maribor
