

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	TRAJNOSTNI RAZVOJ, POTROŠNJA IN MOBILNOST
Course title:	SUSTAINABLE DEVELOPMENT, CONSUMPTION AND MOBILITY

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Obštudijska dejavnost			zimski
Extracurricular activities			winter

Vrsta predmeta / Course type	Obštudijska dejavnost/Extracurricular activities
------------------------------	--

Univerzitetna koda predmeta / University course code:	
---	--

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Laboratory work	Druge oblike študija Field work	Samost. delo Individ. work	ECTS
20	10	AV LV RV			60	3

Nosilec predmeta / Lecturer:	MATEVŽ OBRECHT
------------------------------	----------------

Jeziki / S/A Languages: S/E	Predavanja / Lectures: Slovenski/Slovene
	Vaje / Tutorial: Slovenski/Slovene

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:
Prerequisites:

Ni pogojev	None
------------	------

Vsebina	Content (Syllabus outline):
<p>Temeljna področja obravnave predmeta so:</p> <ul style="list-style-type: none"> -Koncept trajnostnega razvoja -Cilji združenih narodov s področja trajnostnega razvoja -Okoljski vplivi -Izzivi merjenja trajnostnosti -Celovita presoja okoljskih vplivov (ogljični odtis, okoljski odtis,...) -Presoja družbenih vplivov -Identifikacija in presoja trajnostnih in netrajnostnih produktov -Integracija krožnih tokov in postopkov ponovne uporabe kot alternativa masovni potrošnji -Koncept »de-growth« kot nova alternativa obstoječim gospodarskim modelom -Načela trajnostnega življenja -Deljena ekonomija -Trajnostna mobilnost -Nove poslovne priložnosti na področju trajnostne potrošnje in trajnostne mobilnosti v EU 	<p>Basic areas of subject focus are:</p> <ul style="list-style-type: none"> - Sustainable development and UN Sustainable Development Goals - Environmental impacts - Challenges of measuring sustainability - Environmental impact assessment (carbon footprint, environmental footprint...) - Assessing social impacts - Identification and assessment of unsustainable and sustainable products and services - Integrating circular flows and concepts of reuse as an alternative to mass consumption - De-growth concept as alternative to prevailing economic models - Principles of sustainable living - Sharing economy - Sustainable mobility - New business opportunities in sustainable consumption in the EU

Temeljniliteratura in viri / Readings:

Osnovna literature / Essential sources:

Izbrana poglavja iz/Some Chapters from:

- Obrecht, M. (2020). Trajnostna logistika in alternativni viri energije v logističnih procesih : razvoj trajnostne energetike in trajnostnih energetskih modelov : visokošolski učbenik. Celje: Fakulteta za logistiko Univerze v Mariboru.

Cilji in kompetence:

Študenti pri tem predmetu:

- Spoznajo koncept in cilje trajnostnega razvoja
- Oblikujejo pozitivna stališča do koncepta trajnostnega razvoja
- Spoznajo in osvojijo različne pristope za identifikacijo, analizo in presojo okoljskih vplivov (npr. ogljični odtis, okoljski odtis) v praksi na področju mobilnosti
- Se usposobijo uporabljati teoretično znanje s področja trajnostnega razvoja v praksi (mobilnost in potrošnja)
- Spoznajo vpliv in navezanost okoljskih in družbenih vplivov na različne ekonomske podsisteme
- Se usposobijo za identifikacijo trajnostnih načinov življenja in deljene ekonomije v vsakodnevno življenje
- So sposobni kritično presoditi ali je izdelek bolj ali manj trajosten.
- Spoznajo komuniciranje z javnostjo o trajnosti in de-growth strategijah.
- Se usposobijo za razvoj trajnostnih strategij, procesov in ukrepov.

Objectives and competences:

In this course students:

- Get to know sustainable development concept and goals
- Shape positive attitude toward sustainable development
- Get to know different simplified approaches for environmental impact assessment (e.g. carbon footprint, environmental footprint)
- Gain the ability to apply their theoretical knowledge on sustainable development in practice (mobility and consumption).
- Get to know interconnections between environmental, social and economic issues.
- Gain knowledge on integrating sustainable principles and sharing economy in everyday life.
- Are able to assess if product is more or less sustainable.
- Get to know how to communicate with the public and on sustainability and de-growth issues
- Develop ability to design sustainable strategies, processes and practices.

Predvideni študijski rezultati:

Intended learning outcomes:

Znanje in razumevanje

Študenti:

- Obvladajo specifično znanje s področja trajnostnega razvoja in trajnostne potrošnje.
- Se naučijo prepoznavati trajnostne rešitve za vsakodnevno življenje.
- Pridobijo znanje na področju presoje in analize okoljskih in družbenih vplivov.
- Razvijejo sposobnost interpretacije dobljene rešitve.
- Naučijo se prepoznavati poslovne priložnosti na področju trajnostne potrošnje.
Se usposobijo za nadaljnje proučevanje na področju trajnostnega razvoja in trajnostne potrošnje.
- Se zavedajo trajnostnih načel na področju potrošnje in vsakodnevnega življenja.

Kognitivne/Intelektualne veštine

Študenti:

1. Pridobijo razumevanje za kritično analizo načel trajnostne potrošnje ob upoštevanju osnovnih usmeritev trajnostnosti.
2. Pridobijo sposobnost iskanja in sinteze novih informacij s področja presoje okoljskih in družbenih vplivov
3. Se naučijo povezovanja različnih znanj in postopkov ter pomena uporabe strokovne in znanstvene literature o trajnostnem razvoju in trajnostni potrošnji.
4. Znajo identificirati problem trajnostnosti iz različnih zornih kotov ter podati izboljšave oz. rešitve zanj.

Ključne/prenosljive veštine in spremnosti

Študenti:

1. Dalje razvijajo veštine in spremnosti v uporabi znanja na svojem konkretnem strokovnem delovnem področju ter vsakodnevni življenju
2. Nadgrajujejo sposobnost samostojnega učenja.
3. Nadgrajujejo sposobnost uporabe informacijske tehnologije za trajnostno potrošnjo in presojo.
4. Nadgrajujejo sposobnost in spremnost dela v skupini.
5. Razvijajo komunikacijske sposobnosti za učinkovito strokovno komuniciranje s področja trajnostnosti.

Development of knowledge and understanding

Students:

1. Acquire specific knowledge in the field of Sustainable development and sustainable consumption.
1. Acquires specific knowledge in the field of business ethics.
2. Learn how to identify sustainable solutions in everyday life
2. Have a detailed knowledge of theories in the field of business ethics.
3. Gain knowledge of environmental and social impact assessment
3. Learn to recognise business ethics and its interconnections in the field of business.
4. Develop the skills to interpret the gained results.
4. Develop the skills to interpret the gained results in the field of business.
5. Learn how to identify business opportunities in the field of sustainable consumption.
5. Learn how to analyse and synthesise different approaches in the field of business ethics.
6. Are able to pursue further study on process and the field of sustainable development and sustainable consumption.
6. Are able to pursue further analysis regarding business ethics.
7. Are aware of sustainability principles in consumption and everyday life
7. Are qualified to control and supervise business ethics in different organizations.
8. Can demonstrate awareness of wider social and environmental ethical issues in areas of business ethics in different organizations.

Cognitive/Intellectual skills

Students:

1. Understand and apply critical analysis of sustainable consumption, within the framework of sustainable development paradigm.
1. Understand and apply critical analysis of sustainable consumption, within the framework of sustainable development paradigm.
2. Get the ability to search for and synthesize new information from the field of environmental and social impact assessment.
2. Get the ability to search for and synthesize new information from the field of environmental and social impact assessment.
3. Learn how to synthesize different knowledge and are aware of importance of use of professional And scientific literature on sustainable development and sustainable consumption.
3. Learn how to synthesize different knowledge and are aware of importance of use of professional And scientific literature on sustainable development and sustainable consumption.
4. Can identify key aspects of sustainability issue from different perspectives and identify potential improvements and solutions.
4. Can identify key aspects of sustainability issue from different perspectives and identify potential improvements and solutions.

Key/Transferable skills

Students:

1. Further develop skills and expertise in the use of knowledge in a specific working area and everyday life.
1. Further develop skills and expertise in the use of knowledge in a specific working area and everyday life.
2. Upgrade the ability to become an autonomous learner.
2. Upgrade the ability to work in groups.
2. Upgrade the ability to become an autonomous learner.
3. Upgrade the ability to apply information technology for sustainable consumption.
3. Further develop their communication skills in an effective manner to effectively and professionally communicate sustainability issues.
3. Upgrade the ability to apply information technology effectively and professionally.
4. Upgrade the ability to work in pairs and groups.
4. Upgrade the ability to work in pairs and groups.
5. Further develop their communications skills in an ineffective manner to effectively and professionally communicate.

Practical skills

Students:

1. Get practical experience in the field of sustainable consumption and concept of sustainability.
1. Get practical experience in the field of sustainable consumption and concept of sustainability.
2. Are able to act autonomously with defined
2. Are able to act autonomously with defined

Praktične veščine:

Študenti:

1. Pridobi praktične izkušnje na področju trajnostne Potrošnje in koncepta trajnosti
2. Lahko deluje dokaj samostojno, ob podanih navodilih in delnem nadzoru.

guidelines and certain level of supervision.

Metode poučevanja in učenja:

Predmet vključuje različne metode poučevanja in učenja, kot so: predavanja, seminar, diskusjske skupine, video predstavitev in filmi, študije primerov iz prakse, praktično delo ter skupinske predstavitev in samostojni študij študentov.

Predavanja: pri predavanjih študent spozna teoretične vsebine predmeta in primere dobre prakse iz področja trajnostnega razvoja in trajnostne potrošnje. Del predavanj se izvaja na klasični način v predavalnici, del pa v obliki e-predavanj (e-predavanja se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).

Vaje: pri vajah študent utrdi teoretično znanje in spozna aplikativne možnosti kot npr. Izračun okoljskega in ogličnega odtisa za domače gospodinjstvo. Del vaj se izvaja na klasični način v predavalnici, del pa v obliki e-predavanj (e-vaje se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).

Learning and teaching methods:

This course uses a range of teaching methods including lectures, discussion groups, videos and films, case studies, practical work, student presentations and independent study of students.

Lectures: students understand the theoretical frameworks of the course and best practices of sustainable development and sustainable consumption. Part of the lecture course is in a classroom while the rest is in the form of e-learning (e-lectures may be given via video-conferencing or with the help of specially designed e-material in a virtual electronic learning environment).

Tutorials: Students enhance their theoretical knowledge and are able to apply it – e.g. calculating environmental and carbon footprint for student's household. Part of the seminar is in a classroom while the rest is in the form of e-learning (e-seminars may be given via video-conferencing or with the help of specially designed e-material in a virtual electronic learning environment).

Načini ocenjevanja:

Delež (v %) /
Weight (in %)

Assessment:

- | | | |
|---|---|--|
| <ul style="list-style-type: none">▪ Aktivno sodelovanje in delo študentov▪ Seminarska/projektna naloga | <ul style="list-style-type: none">▪ 40 %▪ 60 % | <ul style="list-style-type: none">▪ Active participation of students▪ Seminar/project paper |
